

Name:	George Miguel V. Batalan	Date:	15/09/2023
Program:	III-CPE	Section:	A361

Intended Learning Outcomes:

- 1. Create output with JavaScript.
- 2. Utilize JavaScript variables and data types.

HTML Source Code:

```
<!--Name: Goerge Miguel Batalan-->
<!--Course: Computer Engineering-->
<!DOCTYPE html>
<html>
   <!-- linking CSS file to HTML file-->
   <head>
       <link rel = "stylesheet" href = "lab5.css">
        <title> Laboratory Task 4 - A Complete CSS Website </title>
   </head>
    <body>
        <header>
            <script src = "java.js"></script>
            <h1> A Complete CSS Website </h1>
            <h6> By George Miguel Batalan </h6>
```

Laboratory Exercise 5

INTRODUCTION TO JAVASCRIPT

```
<button onclick = buttonMode()> Light Mode </button>
            <button onclick = buttonMode() > Dark Mode </button>
        </header>
        <div>
            <div class = "Nav">
               <a href = "https://www.facebook.com/mapuamcm"> CPE104L</a>
                <a href = "https://www.facebook.com/mapuamcm"> CPE107L </a>
                <a href = "https://www.facebook.com/mapuamcm"> CPE121L </a>
                <a class = "cpe" href = "https://www.facebook.com/mapuamcm"> CPE </a>
            </div>
            <div class = "box">
                <div class = "school">
                   <h5> Mapua Malayan Colleges Mindanao </h5>
                     Excellence and Relevance
                    <img src = "MCM.png">

        <h3> CPE143L - Web Design and Development (Laboratory) </h3>
    </footer>
</html>
```

CSS Source Code:

```
header {
    text-align: center;
    border-style: groove;
    background: darkkhaki;
}
body {
    background-color: white;
    background-repeat: no-repeat;
    background-attachment: fixed;
    background-size: 100%;
    text-align: center;
div.box{
    width: 100%;
    height: 100%;
    display: flex;
    flex-direction: row;
    flex-wrap: wrap;
div.Nav {
    background: khaki;
    border-style: groove;
    height: 30px;
    font-size: 15px;
    text-align: left;
    font-family: "Times New Roman";
}
a.cpe {
    float: right;
div.school{
    width: 850px;
    height: 450px;
    background-color: darkkhaki;
    padding: 1%;
    margin: 1%;
    border-style: groove;
div.me{
```

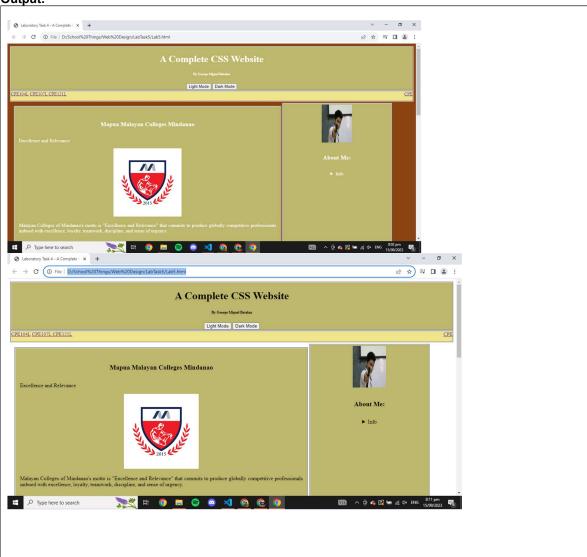

```
width: 350px;
    height: 600px;
    background-color: darkkhaki;
    padding: 1%;
    margin: 1%;
    border-style: groove;
    float: right;
div.cea{
    width: 850px;
    height: 850px;
    background-color: darkkhaki;
    padding: 1%;
    margin: 1%;
    border-style: groove;
}
div.food {
    width: 350px;
    height: 600px;
    background-color: darkkhaki;
    padding: 1%;
    margin: 1%;
    border-style: groove;
    float: right;
.DarkMode {
    background-color: saddlebrown;
    color: white
.LightMode {
    background-color: yellow;
    color: black;
}
li{
    font-size: 20%;
    text-align:justify;
}
p {
    text-align: justify;
h5 {
    font-size: 125%;
```

```
footer {
   border-style: groove;
   background: khaki;
   font-family: Arial;
   font-size: 12px;
   text-align: center;
   padding: 1%;
   font-weight: 100;
}
```

JavaScript Source Code:

```
function buttonMode() {
    var element = document.body;
    element.classList.toggle("DarkMode")
}
```

Output:

Findings and Observations:

I observed that this can be used as a future preference to the html website we are going to make for people who prefer it to de dark or light because of their eye's sensitiveness
